About US

Achieve seamless furniture edges with 90-degree bendable PVC laminates engineered for flexibility, strength, and flawless design integration.

ELENTATM

We are passionate creators of surfaces that transform everyday spaces into extraordinary experiences. With a deep understanding of design, texture, and innovation, we craft laminates that blend aesthetics with durability.

Our collection is inspired by nature, architecture, and modern lifestyles—bringing together timeless elegance and contemporary trends. Every sheet is designed with precision, ensuring superior quality, long-lasting performance, and a flawless finish.

Driven by creativity and guided by craftsmanship, we aim to deliver surfaces that not only enhance interiors but also reflect individuality and style. From subtle textures to bold statements, our laminates are made to inspire.

At our core, we believe in redefining spaces one surface at a time.

I N S P I R E

NATURE

ELENTA™

A WORLD OF COLORS

Step into a world of colors where creativity meets emotion and every shade tells a unique story. From soft pastels to bold vibrant tones, colors transform spaces, inspire imagination, and bring life to interiors with harmony, beauty, and endless design possibilities.

Explore a world of colors designed to inspire creativity and elevate interiors. Each color brings depth, character, and emotion, turning simple spaces into vibrant expressions of design, personality, and artistic harmony.

ADVANTAGES OF PRODUCT

Can be processed
with conventional
wood working tools

Easy cleaning due
to hard coat finish

Impact resistant and 10 times
more durable than real glass

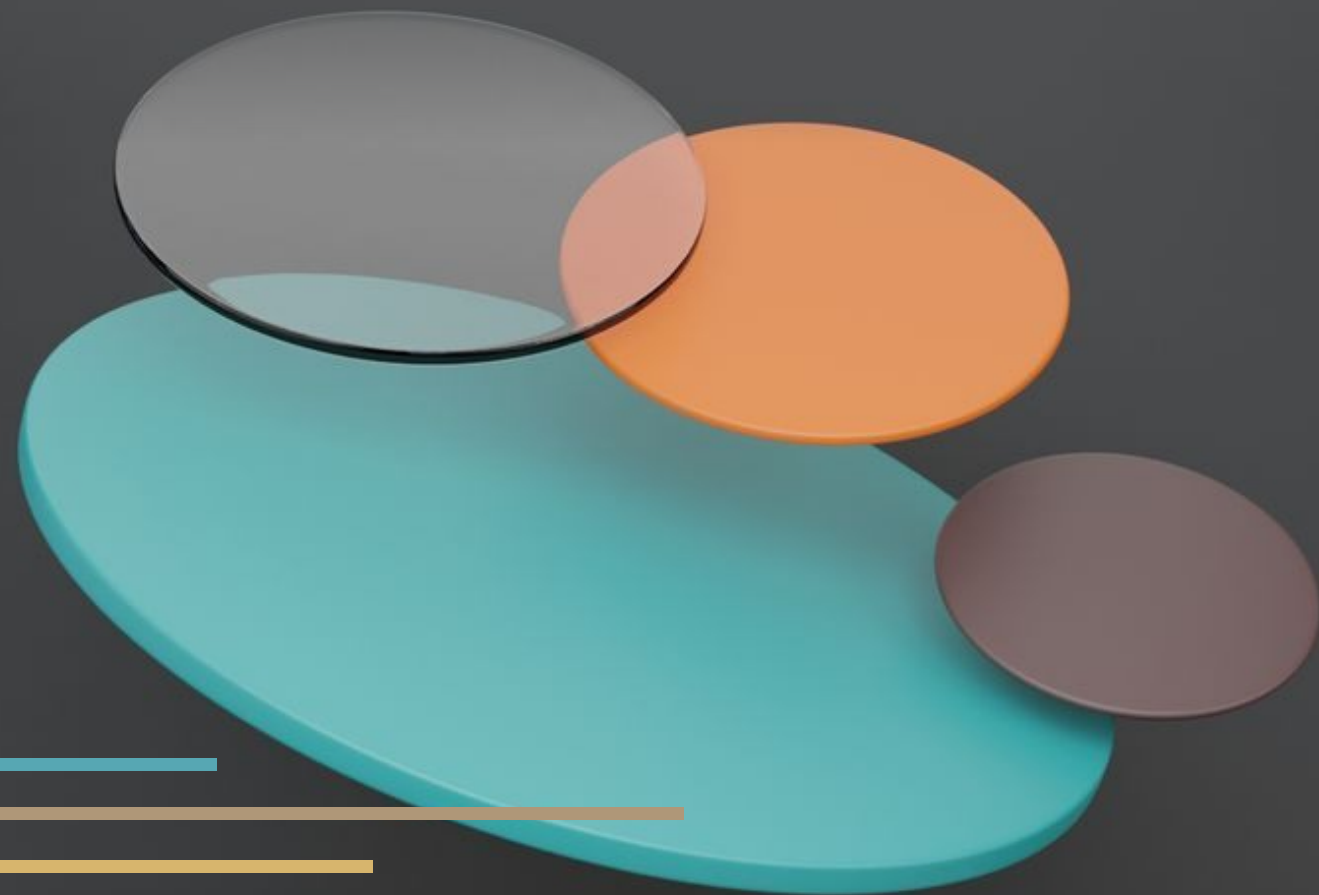

50% lighter
than real glass

Colour and
UV-stable

High scratch resistance
due to its hard coat finish

90° bendable PVC laminates designed for seamless edge finishing, offering flexibility, durability, and smooth aesthetics for modern furniture and interior applications.

TECHNICAL

ABOUT PVC LAMINATE & PVC LINER

- Laminate Thickness: 1.2 mm (± .10 mm) Available in 1mm to 3mm thickness on order.
- Liner Thickness: 0.7 mm (± .10 mm) Available in 0.7mm to 3mm thickness on order.
- Standard Sheet Size: 1220 mm X 2440 mm
- Sheet Options: Any length can be provided on order

WHY ELENTA ?

we are committed to designing innovative decorative finishes, whether Solid Gloss, Marble, 3D, Metallic, Gloss, Natural Wood and many more. Each laminate is designed in house to be the very best and to deliver impeccable performance throughout its use.

CUSTOMIZED SIZES AND SHADES CAN BE DEVELOPED ON REQUEST !

Extra care is required during vertical pasting of laminate sheets as there is a possibility of formation of air bubbles due to lack of uniform pressure.

Avoid direct sunlight, this may cause color fading.

Cracking at corners may be caused by poor planning, improper packing, improper transportation conditioning. Avoid all these to prevent it from cracking.

Do not use chemicals for cleaning.

APPLICATION PROCEDURE

ADHESIVE: Water and solvent based adhesives are normally used with plastic laminates. We do not suggest the use of heat activated adhesives. Recommended adhesive to be used while pasting laminate - Probond and Heat-X

CUTTING AND INSTALLATION: These PVC FLEXIBLE Sheets can be easily cut, routed and drilled, with most common wood working tools or equipments. All blades must be sharp to remove any burrs that may occur in cutting process, use a smooth file to feather all corner edges.

LAMINATION : A clean, dry surface is necessary for adhesive bonding, non porous surfaces as found on metal, plastic and any other material should be degreased, dried and roughened by sanding or chemical etching. Proper care must be taken prior to bonding. We DO NOT recommend any kind of coat on our product. Coating will spoil the originality and natural beauty of the laminate sheet.

BENDING: Use only V-Groove cutter to bend the sheets at 90°, or a Groove of 0.3 mm to 0.5 mm for bending the sheet up to 90°. For any further inquiry, contact us.

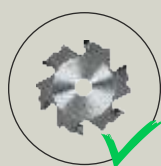

MAINTENANCE: Avoid any kind of chemical contact, keep away from sunlight, protect it from the sharp metal edges to avoid scratches. Remove protective film after installation.

WARRANTY: Colour shade may vary from one lot to another. Inspect it before cutting or pasting. Company's liability is limited to the cost of the product only.

TOOLS FOR LAMINATE

Diamond cutter for Sheet cutting

V- Groove Cutter for proper 90° Bending

Avoid other Cutting Blades

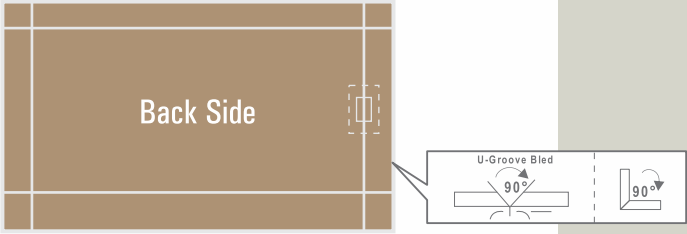

90° BENDING PROCESS IN PVC LAMINATES
EDGE BAND TAPES NOT REQUIRED

STEP 01

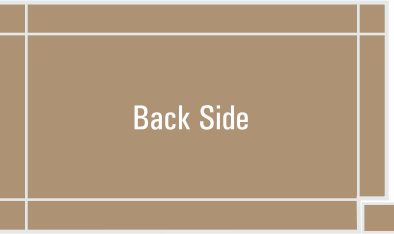

Cut your sheet as per your desired size and shape.

STEP 02

Use a V-groove cutter (available easily in the market) to make a groove on the sheet.

STEP 03

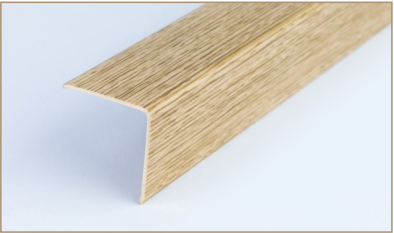

Next, use a regular pair of scissors to trim the edges out.

STEP 04

Place the sheet front up and use the groove marks to bend the sheet towards the outside.

STEP 05

Now your sheet is ready to be used.

Diamond cutter blade
For cutting, routing and drilling, we only recommend using a diamond cutter blade. To avoid any burrs during cutting, ensure all the blades are sharp. A smooth file can be used to feather all the corner edges.

Router blade
A 4"x8 mm x 6 Tee Radius C-groove blade should be used for bending Elenta PVC laminates. The recommended groove depth is 0.8 mm & width 5 mm or more. Routed sheet will easily bend up to 90°.

INNER PVC LAMINATES

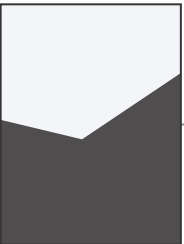

WHITE INNER SHEETS OFF WHITE

Thickness: 0.72mm (+- 0.05)
Size: 8' x 4' (2440mm x 1220mm)
Thickness can be from 0.7 to 1.2 as per requirement

- 1.HIGHLY DURABLE : PVC Laminate have long durability as compared to any finest company laminate sheet.
- 2.CRACK FREE : PVC Laminates does not get cracked after applied like as regular HPL Laminates do.
- 3.UNICOLOR EDGE : PVC Inner sheet is with unicolor sheet were as HPL Laminate is not Unicolor so edges are easily visible.
- 4.WATER PROOF : PVC Laminate Inner sheet is water proof so can be applied at water effected area without any worries.
- 5.HIGHLY FLEXIBLE : PVC Laminate is easily transportable the problem of cracking sheet of breaking sheet during the transportation by falling of striking is not visible. PVC sheet is very flexible and of very high strength.
- LESS FEVICOL : For pasting PVC Laminate is used and consumption of per sheet is 25% less as compared to fevicol used in HPL sheet as overall cost remains same.

HIGHLY FLEXIBLE

CRACK FREE
